Forecast for Monday 11 Jan 2021

Weather: Clear spells across eastern parts through the early hours but rather cloudier in west with patchy mainly light rain and summit sleet or snow. A few spots of rain or drizzle in the west during the morning but most places dry with some sunny spells, especially in east. Becoming cloudier through the afternoon with outbreaks of rain developing, these becoming persistent and occasionally heavy, especially in west, during the evening.

Chance of cloud free mountain/hill tops above 600m: Around 60% in west but nearer 90% in east, falling close to zero through the afternoon.

Visibility: Occasional or periods of cloud above 600m in west, the cloud patchier in east through the morning. Cloud developing more widely in afternoon to become periods or persistent above 450-600m. Below the cloud visibility hazy, but good in east, falling to just a few kilometres in heavier rain.

Meteorologist's View

Gusts around 55mph over ridges and summits in the afternoon.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Sun 10 Jan 2021	0mm	0.2mm	0.4mm

Forecast for Tuesday 12 Jan 2021

Weather: Cloudy with outbreaks of rain, occasionally heavy, through the early hours. The rian edging away south through the morning, with perhaps a little snow on the higher summits before it clears. Some brighter spells and into the afternoon but cloud increasing again later with outbreaks of rain, perhaps briefly some summit snow, spreading east through the evening.

Maximum wind: Westerly 25-30mph, gusts around 55mph over ridges and summits, through the early hours, turning northwesterly 15-20mph soon after dawn, then backing Southwesterly 5 to 10mph in the evening.

Chance of cloud free mountain/hill tops above 600m: Little chance until mid-morning then improving to close to 100% by early afternoon before chances fall again through the evening.

Visibility: Periods or persistent cloud above 450m-600m lifting above the summits and breaking through the morning, then periods above 600m returning in evening. Visibility below cloud hazy falling to just a few kilometres in heavier rain or summits snow, becoming very good for a time through the later morning and afternoon.

Temperature: **Valleys:** Around plus 4 or 5 Celsius at dawn rising to plus 6 or 7 Celsius by day.
At 600m: Around plus 5 Celsius falling soon after dawn to plus 1 Celsius, by late afternoon.
Freezing level: Above summits falling to 800m, rising again later.
